Digital TV Adapters

Adapters

"We have had the opportunity to utilize Anacom MedTek services and hospital "Nurse Call" devices. We have appreciated the quality and customer service provided us by Anacom MedTek. Looking to the future as we both expand and upgrade our facility, we appreciate the foresight of your company in providing devices like the "series 7" liquid sealed pillow speakers, which appear to satisfy our need to insure a higher standard of quality for our patients welfare. Thank You."

*Gary C. Gilson, Facilities Engineering
The Ohio State University Hospitals, OH*

Adapters

by Nurse Call System

Adapters are low cost solutions to expanding your nurse call system. Adapters can accommodate multiple nurse call devices such as call cords, additional pillow speakers, and fall prevention equipment.

Adapters will also allow pneumatic nurse call devices to be used simultaneously with standard call cords or pillow speakers off a single receptacle. Adapters can also be used to change connector types between nurse call systems. All Anacom MedTek adapters are made with exclusive Duraflex™ cables for longer life. Strain reliefs are provided on all connectors.

Anacom MedTek has an extensive library of adapters that can meet your specialized requirements.

Call **1-800-955-9540** to contact an account representative.
